Research Overview

I work on Applied Data Science in Urban Context, Data for AI and Business, Privacy Economics, AI Ethics. My works focus on practical problem solving, risk tracking and system-level improvement for human good.

With an interdisciplinary background of Urban Planning, Analytics and AI, I aim to deepen my research in the application of machine learning, AI and robotics in the built environment, bridging the gap between traditional urban planning methods and the AI industry. I am also interested in the ethical concerns of smart city AI, which involves the detection, evaluation, and prevention of the misuse of data, media, algorithms, and IoT system of the built environment.

Education

M.S. in Urban Planning, Columbia University, Minor in Urban Analytics 2019.9 - 2021.5

Main Courses: Machine Learning, Python, ArcGIS, Economics, Statistics, Web Development

Dissertation: How Population Size and Density Affect the Spread of COVID-19 - A Quantitative Study of the United States at the County Level

Committee: Weiping Wu, Stephen Morse, Boyeong Hong

B.Eng., Tongji University, Landscape Architecture 2015.9 - 2019.7

GPA 4.67/5.0 Baosteel First Price, 2018 (1st of Grade)

Attended China International Industry Fair as the only student rep. of Tongji University, 2018

1st Price of Think Youth - Shanghai International Digital Creation, Innovation & Entrepreneurship Competition, 2017

Language and Skills

Python: Pandas, Streamlit, Scikit-learn, Plotly, BS4, Selenium, Urllib3, Jieba

Other Skills: SQL, C, JavaScript, R, Stata, Tableau, ETL, Pytorch, API Pipelines, Data Scraping, ArcGIS, Adobe Suite, HTML, CSS, Excel, Three.js

Work Experience

AI Engineer - Huawei Terminal Cloud Service Xiaoyi Department 2025.7 - 2025.11

Work Content: Pytorch, SFT, Pretrained Data, Auto-labeling, Prompt Engineering, Linux

- *Share top paper, listen to lectures, practice high-quality coding and attend exams*

Learned Pytorch, Linux, and platform services from colleagues and internal resources. Passed the Advanced Coding and Algorithm Design Test of Huawei.

- *Designed and built pretrained chart data auto-generation pipeline*

Generated 5 million diverse chart images per month, quality inspection score reached 92/100.

Boosted the conversion rate from under 30% to over 2000% across all chart types.

- *Implemented a large-scale data scraping and processing plan*

Designed and constructed a recursive data processing pipeline based on similar-image scraping.

Full-Stack Data Engineer - Petlibro

2024.10 - 2025.5

Work Content: Modelling, Algorithm Design, ETL, Dashboard Building, Shopify, Cost Analysis

- *DTC Data ETL and API Engineering*

Built the DTC ETL system via MySQL, DS, and Jenkins. Aligned coding logic with the business needs of multiple departments, saved 30%+ runtime and recovered \$100,000+ benefits.

- *Dashboard design, regular report, algorithm improvements*

Self-taught Python Streamlit, built a full-stack dashboard series for DTC reports and insights.

Learned and Implemented AI Tools and LLMs.

Data Analyst and Researcher - Shenzhen Fufeng Corporation

2024.4 - 2024.7

Work Content: Time-Series Modelling, Government Report Writing, Macro-Economic Analysis

- *Wrote 5+ high-quality government reports on economics and policy suggestion*

Won the commendation from a client in the Statistics Department of Shenzhen.

Data Analyst and Coordinator - City of Jersey City

2022.8 - 2023.6

Work Content: Data Analysis, Scraping, Government Report Writing, Project Management

- *Database build, maintenance and reporting*

Standardized JC Affordable Housing databases in detail (2000+ manual data from 120+ sources).

Integrated rental data from other departments and web sources by scraping and API connecting.

Wrote monthly/yearly reports on housing and economics data to support government decision.

- *Project managing JCAH Website and provide tech assistance*

PM and Lead for the “Jersey City Affordable Housing One-Stop Application Website” (contract value \$150,000+). Conducted user profiling researches, designed pricing structures and protocols, assisted with web design issues. advanced 80% of project progress within 30% total time.

Analyst and Coordinator - TRANSCOM

2021.10 - 2022.5

Work Content: Data Analysis and Visualization, Government Report Writing, Project Management

- *Report and contract writing on transportation and big data procurement*

Wrote yearly reports on NY-NJ-CT tri-state traffic data usage and changes, analyze the impact of the COVID-19, time, location, season. Assisted with contract writing for procurement.

Publications

A Study on the Impact of Innovation Rules in Regional Trade Agreements on the Cross-Border Flow of R&D Factors. Yuhong Sun, Jinzhe Li, Qingyuan Li. World Economic Research, 2024(09)

[\[Working Paper\]](#) An Empirical Analysis of the Impact of GDPR's Privacy Protection on the Cross-border Flow of Digital Services. Yuhong Sun, Qingyuan Li

[\[Working Paper\]](#) The Impact of Government Artificial Intelligence Readiness on the Cross-Border Flow of Digital Services. Yuhong Sun, Qingyuan Li, Jinzhe Li

[\[Working Monograph\]](#) Research on the Current State of Global Artificial Intelligence Governance and International Cooperation. Chapter 2,5,7. Qingyuan Li
